## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-45 are allowed.

The following is an examiner's statement of reasons for allowance: Claim 1 includes the limitations that a method for measuring neutron interaction properties of an earth formation comprises irradiating with a plurality of short duration neutron bursts, detecting short duration neutron burst phenomena, and detecting long duration neutron burst phenomena. Claim 13 includes the limitations that a method for measuring neutron interaction properties of an earth formation comprises irradiating with a plurality of neutron bursts having a duration selected to enable detection of inelastic gamma ray phenomena, and detecting long duration neutron burst phenomena. Claim 23 includes the limitations that a method for logging earth formations comprises irradiating with a plurality of neutron bursts having a duration selected to enable detection of inelastic gamma ray phenomena, detecting inelastic gamma ray phenomena, and detecting long duration neutron burst phenomena. Claim 35 includes the limitations that an instrument for detecting neutron interaction phenomena comprises a controller adapted to cause a neutron source to emit multiple short duration neutron bursts and permit detection of phenomena related to long duration neutron bursts stimulated by multiple short duration neutron bursts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
